DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-23 and 66-68, drawn to a flashlight lamp bulb base, classified in class 362, subclass 197.
 - II. Claims 24-39 and 65-68, drawn to flashlights, classified in class 362, subclass 202.
 - III. Claims 40-54, drawn to a method of manufacturing of a lamp bulb and lamp base combination, classified in class 445, subclass 66.
 - IV. Claims 55-64, drawn to flashlight tail caps, classified in class 439, subclass 664.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, while inventions I and IV can be use together in a single apparatus, such as invention II, each one of inventions I and IV does not require the features of the other invention (e.g. invention I does not require the features of invention IV, and invention IV does not require the features of invention I) to be fully functional. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2875

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
